Free Resource of the Day

An Evening with Ray Bradbury

Renowned science fiction author Ray Bradbury (Fahrenheit 451, The Martian Chronicles) gives aspiring writers some encouraging insight in this short lecture provided on streaming video by UCTV. Beginning with a list of essential practices he feels all writers should adhere to, Bradbury then demonstrates how events and people in his personal life fed his classic stories. Inspiring, funny and delivered with irreverent wisdom, Bradbury's account of his career is a sincere argument for "writing what you know". This talk is available on streaming video through YouTube.

Fahrenheit 451 is Ray Bradbury's classic novel of censorship and defiance, as resonant today as it was when it was first published more than 50 years ago.

The system was simple. Everyone understood it. Books were for burning, along with the houses in which they were hidden. Guy Montag was a fireman whose job it was to start fires, and he enjoyed his job. He had been a fireman for 10 years, and never questioned the pleasure of the midnight runs, nor the joy of watching pages consumed by flames. He never questioned anything, until he met a 17-year-old girl who told him of a past when people were not afraid, and a professor who told him of a future in which people could think. Guy Montag suddenly realized what he had to do.

Born in Cambridge in 1952, Douglas Adams is the beloved creator of *The Hitchhiker's Guide To The Galaxy* and its various incarnations as books, audio progams, radio plays, and most recently a movie. Hitchhiker's phenomenal, award-winning success led to a series of sequels, most of which having been adapted successfully into other mediums in their own right. Known for his incisive wit, and a particularly absurdist sense of humor, Adams has culled a massive audience of devoted followers over the years.

Unforunately Adams passed away in 2001, but his fanbase and their devotion has only grown since then, and shows no sign of ending anytime soon. LearnOutLoud.com is happy to present Adam's work on audio (most of which is read by the author) with the hope that you will find the same joy that millions of people have derived from Adams' work over the last 25 years. So come aboard, have some fun and always remember: Don't Panic!

Jack London Audio Books

Jack London was born John Griffith Chaney on January 12, 1876. He was an American author and journalist, also noted for his work in social activism. The native San Franciscan adopted the name Jack as a boy, and worked odd jobs that usually involved hard labor as a teenager. London was always an avid reader and began submitting his own stories and poems to many publications. He decided to become a writer to escape the laborious lifestyle of a factory worker, though initially he garnered little success.

It wasn't until after a winter in the Yukon, where London found inspiration for **The Call of the Wild**, that he achieved writing success. He began publishing in 1899 and after achieving some public notoriety began using it as a platform for disseminating his views of socialism. However, London often received criticism for these writings since his life was marked by capitalist achievements in seeming direct contradiction to his beliefs. Later in life, London developed a strong interest in agriculture and settled on a California ranch where he died from renal failure in 1916 at the age of 40.

For an audio experience of London's most popular novel, try the **The Call of the Wild**, his unique novel portraying the life of a once-pampered dog who is uprooted from his life of luxury to work as part of a dogsled team. Also available on audiobook is **The Mutiny of the Elsinore**, which portrays a disillusioned New Yorker who embarks for a grueling life at sea. Finally, there is **The Sea Wolf**, which tells a psychological tale of man's dual nature amidst a backdrop of ocean dangers.
